

# OpClear<sup>®</sup>

## CONTINUOUS VISION

A NEW STANDARD OF CARE

**CLARITY**  
of the surgical site with  
**intelligent CO<sub>2</sub> flow**  
at the lens tip

**CONTROL**  
of visual obstructions  
with on demand  
**in-situ lens wash**

**CONTINUITY**  
of surgical procedures  
**minimising scope**  
**removal events**

# The OpClear® platform

## Intelligent CO<sub>2</sub> flow

at the tip of the laparoscope protects the lens from condensation and small particles within the abdominal cavity

### Condensation and small particles Before and after intelligent CO<sub>2</sub> flow

Before

After

## In-situ on demand CO<sub>2</sub> and saline lens wash

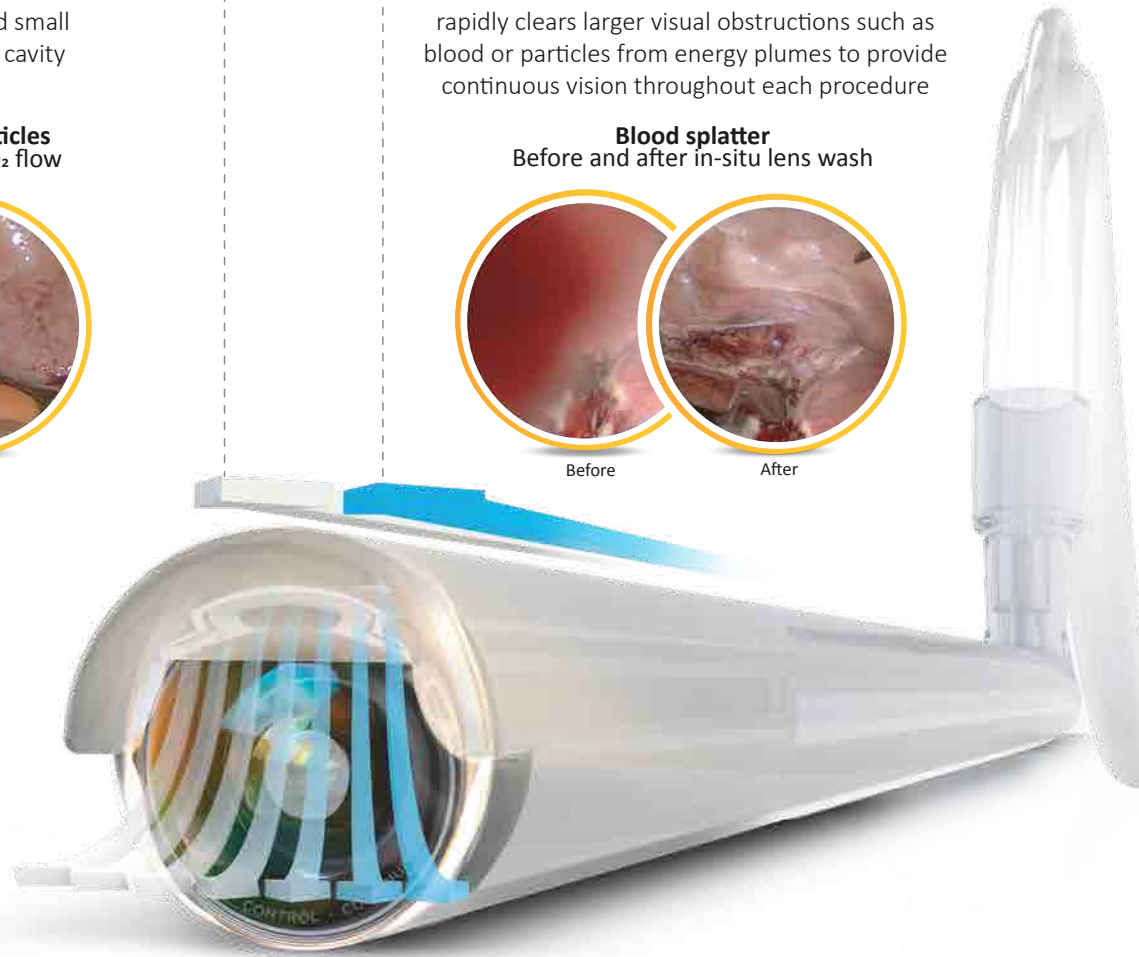

rapidly clears larger visual obstructions such as blood or particles from energy plumes to provide continuous vision throughout each procedure

### Blood splatter Before and after in-situ lens wash

Before

After

*Procedures completed with OpClear®  
reported a 97% reduction in scope removal events<sup>1</sup>*
